# Welcome

to the **September 2024** issue of Seaplant...

The magazine focused solely on advertising the equipment and services of trusted companies in the commercial marine industry. We work in partnership with our clients to promote their business through print, online, social media and networking.

## This month

This month we are proud to be **media partners** with **SMM Hamburg** and have dedicated our issue to this fantastic event. We have **Construction and Civils** (p5) followed by **Cranes, Winches & Lifting Equipment** (p6-8); **Diesel Engines, Power & Propulsion** (p9-13); **Diving & Underwater Services** (p14-15); **Hydraulics & Pumps** (p16-19); **Mooring** (p20); **Maintenance & Inspection** (p21); **Safety & Training** (p22-23) and **Vessel Sales & Charter** (p24-26).

## Next month

Next month we are media partners with **Liftex**, the essential annual exhibition for the lifting equipment industry. Contact us early to book your space.

Best regards,  
Karen, Anne, Chris, Fran, Alex,  
Margaret and Chris.

# DIVING & UNDERWATER SERVICES

**Sub Aqua Diving Services (UK) Ltd (SADS)** were established in 1975. For almost 50 years we have been carrying out diving operations all over the UK, mainly in the North East. Our clients have varied, our ethos has not! We have completed projects **SAFELY, EFFICIENTLY & WITHOUT INCIDENT** for a host of different clients including marine civil engineering, Port and Water authorities, Government agencies, Nuclear power installations and renewable offshore wind farms.

- Search & Recovery
- Marine Salvage
- Underwater Cutting
- Safety Boat Work
- Underwater Inspection
- Repair & Maintenance
- Outfall and Intake Maintenance
- DSV Hire

Being accredited to both ISO 9001:2015 & ISO 45001:2018 and certified by BSI demonstrates we have effective Health, Safety & Quality Management Systems in place, which make our organisation more efficient, able to meet legal requirements, demonstrating our commitment to legal obligations.

## DIGITAL VIDEO RECORDING, INSPECTION SYSTEMS & ROVTOOLS

Developed for use by personnel with all levels of experience when completing subsea visual inspections, which require real-time event logging

The EdgeDVR is available as a 3U and 4U rack-mounted unit offering greater input and output possibilities, or as a 2U rack-mounted unit specifically for local network IP camera recording.

Whether you prioritise maximum performance, maximum portability, or something in between, we have EdgeDVR systems to suit you.

**4K HD SD**

Tooling options for inspection and workclass ROV's

The ROVtools RTK-01 is a flexible and highly versatile toolkit providing ROV operators with a modular set of tools that allows them to perform common tasks with greater ease and efficiency whilst reducing operational time.

This includes cutting ropes up to 25mm in diameter, taking cathodic protection readings, measuring marine growth and cleaning subsea structures.

Available in 5 sub kits as well as the full pelcase version.

Visit [rovtools.co.uk](http://rovtools.co.uk) for more information

## QUALITY HYDRAULIC PUMPS

We distribute Bearing and Bushing Pumps, Motors and Flow Dividers designed for global compatibility with other commercial components.

- 1 BEARING GEAR PUMP**
- 2 BUSHING GEAR PUMPS**
- 3 MOTORS AND FLOW DIVIDERS**

**OUR EXPERTISE**

- Hydraulic Pump Design and Refurbishment
- Repair and refurbishment of Cast-Iron Gear Pumps, Motors, and Flow Dividers
- Continuous Process Improvement to ISO 9001:2015 standards through our Head company Gear Pump Manufacturing (GPM) in South Africa.

**SERVICES**

The company assembles, manufactures and supplies a comprehensive range of pumps and motors to meet specific customer requirements and those of the general market.

- Hydraulic Bearing and Bushing Gear Pumps
- Bearing and Bushing Flow Dividers
- Bearing and Bushing Hydraulic Motors
- Replacement Parts / Components
- Add-a-Pump
- Piggy-back Pumps

**INTERNATIONAL**

We distribute quality hydraulic pumps, motors and flow dividers to the United Kingdom, Northern Countries, Europe and Middle East. Through our worldwide Supply Chain Network, supporting and replenishing them from three wholly-owned international warehouses - one located in Cape Town, South Africa, another in Vestbit, Mississippi, USA and a third in Bromsgrove, Worcestershire in the United Kingdom.

## Rruce Roberts Europe B.V.

**Bruce Roberts Europe specialises in design, development and supply of knock down kits in steel and aluminium**  
**So what's different ...? Well, our approach is!**

We believe in sharing our design and development experience with the builder and vice versa welcoming their input on building habits, preferences and local conditions. It takes a bit of effort and time from both parties, but brings great benefits.

- Reduce wastage of costly manhours from our step by step assembly
- Manuals, showing the correct building sequence and assembly method

Our expertise can handle any boat design and development project from start to finish however our speciality lies in the range up to 20m LOA custom and semi custom boats.

## UNLOCKING EFFICIENCY AND PRECISION IN AQUACULTURE

In the dynamic world of fishery and aquaculture, meticulous observation and proactive maintenance are the keys to success. CHASING Innovation proudly presents its subsea ROV solutions, designed to streamline regular observation and inspection processes, facilitate real-time monitoring of water quality parameters, and enhance debris removal practices.

CHASING M2 PRO MAX industrial-grade ROV features high-power anti-stuck motors and exceptional anti-flow capabilities, offering unmatched performance in challenging underwater environments. With eight thrusters that enable precise 360 degree omnidirectional movement, a diving depth up to 200m, and an HD 4K EIS lens, CHASING M2 PRO MAX delivers unparalleled clarity in inspection recordings. The standard 300W battery boasts a 4-hour runtime, with support for seamless replacement with a 700Wh battery or shore-based power supply. The slide-in platform enables quick accessory assembly and disassembly, along with a built-in docking station, offering versatile accessory mounting options and allowing for the integration of additional tools and equipment to suit specific operational needs. The external floodlights provide 8000lm brightness and avoid visual interference caused by the reflection of floating debris.

### Benefits at a Glance:

**1. Regular Observation and Inspection:** CHASING ROVs empower fish farm owners with the ability to conduct regular, thorough inspections of cage environments. By effortlessly maneuvering through underwater spaces, these ROVs ensure that every aspect of the aquaculture operation is meticulously monitored, allowing for early detection of issues and timely intervention, such as fishing net damage or potential hazards.

**2. Real-time Monitoring of Water Quality Parameters:** With CHASING ROVs, monitoring essential water quality parameters becomes a seamless and instantaneous process. From pH levels to dissolved oxygen concentrations, these ROVs provide real-time data, enabling

aquaculturists to make informed decisions and maintain optimal conditions for aquatic life.

**3. Efficient Debris Removal:** CHASING ROVs excel in debris removal tasks, efficiently clearing cage environments of any unwanted materials or biofouling. By keeping cages clean and free from obstruction, these ROVs foster a healthier environment for aquatic organisms to thrive, ultimately enhancing overall productivity.

### Accessories for Enhanced Functionality:

- **CHASING WSRC:** Waterproof and user-friendly, this large screen facilitates easy data management, even in adverse weather conditions.
- **CHASING Grabber Arm 2:** Versatile and precise, the grabber arm facilitates underwater salvage, sampling, and biofouling removal with ease.
- **CHASING Floodlight 2:** Enhance visibility in turbid waters with the CHASING Floodlight 2, ensuring clear observations in any environment.
- **CHASING Water Sampler (500ml):** Facilitates precise onshore water quality testing, essential for maintaining optimal aquaculture conditions.
- **CHASING Multi-Parameter Sonde:** Real-time monitoring of crucial water parameters ensures proactive management of aquaculture environments.

- **Backup Batteries and C-SPSS:** Ensure uninterrupted operations with backup batteries and the CHASING Shore-based Power Supply System, minimizing downtime and maximizing efficiency.

CHASING's ROV solutions have been embraced by aquaculture professionals worldwide for their reliability, efficiency, and ability to revolutionize industry practices. As the aquaculture sector continues to evolve, CHASING remains at the forefront, driving innovation and empowering stakeholders with cutting-edge technology.

## DMAC MARINE LAUNCH A BRAND NEW WEBSITE

### Exciting news from DMAC Marine!

It has launched a brand new website showcasing its expertise in the marine industry. With over 25 years of experience, its vessel, Halcyon Days, has been instrumental in numerous projects since 2019. Last year alone, in 2023, it supported over 200 projects, collaborating with industry giants like Balfour Beatty, Cammell Laird, and Stena Line.

Offering professional services such as small cargo arrangements, crew transfers, diving projects, survey projects, safety support, and more, Halcyon Days operates along the West Coast of England and Wales with a working range of over 200 miles. Equipped with the latest electronic, navigation, and safety equipment, their vessel ensures 24-hour capabilities.

Dedicated to providing tailored solutions for short-term charters or long-term projects, it offers special rates for extended projects. For details on chartering the vessel, feel free to send a message. DMAC Marine, is there to help meet your maritime project needs.

For further information please contact:  
DMAC Marine  
Website: [www.dmacmarine.co.uk](http://www.dmacmarine.co.uk)

## BARTECH HAS SOME VERY EXCITING NEWS!

Bartech has just been honoured with the Specialist Engineering Service Supplier of the Year Award at the UK Ports Sustainability Awards ceremony!

Sarah Diss was fortunate enough to attend the ceremony last week, which was a great occasion, and can speak for everyone at Bartech when she says, "This award genuinely means the world to us."

### Why is it so important? Simple:

It recognises its commitment to delivering exceptional engineering services and its dedication to sustainability within the marine industry; both critical parts of who it is and what it does. The entire Bartech team has worked exceptionally

hard for this, and Sarah is so proud of them all.

## How does it benefit you?

It demonstrates once again that you can trust them to provide innovative, reliable and sustainable engineering solutions for your organisation. Here is some of what you can rely on when you choose Bartech:

**Expertise:** The award-winning team is equipped to handle complex engineering challenges, ensuring your projects are completed to the highest standards.

**Efficiency:** Solutions are designed to minimise downtime and optimise performance, saving you time and money.

**Sustainability:** Prioritising environmentally friendly practices, helping you meet your sustainability goals without compromising on quality.

Thank you for your continued support and trust in Bartech - they look forward to continuing to provide you with the highest-quality engineering solutions, and if you need help or support with any of your critical equipment, please let the team know; they are here to help.

For further information please contact:  
Bartech Marine Engineering  
Website: [www.bartechmarine.com](http://www.bartechmarine.com)

## ALPHAGEO SUPPORTS GRASSROOTS FOOTBALL

AlphaGeo, experts in underwater remote operated vehicles (ROVs) and drones, have sponsored Hanley Youth Football Club. They wish them a great start to the season!

AlphaGeo is a UK-based reseller of drones, unmanned aerial vehicles (UAVs) and payloads, underwater ROVs, underwater drones (AUVs), land and hydrographic survey equipment and software, providing a full range of UAV and ROV services.

### Underwater ROVs

Their remote operated vehicles are sourced direct from the world's leading remote underwater vehicle manufacturers and are available to purchase online. They also have a range of

ROV services, accessories, drones, robots and add ons. If you would like further information on their full range and types of ROVs available, please contact them directly and one of their underwater vehicle experts can discuss your needs.

### Commercial Drones & Unmanned Aerial Vehicles

Find the perfect drone for your business with AlphaGeo UK range of commercial, professional and business use drones and UAVs (unmanned aerial vehicles). They also have a range of drone accessories and add-ons. They source their drones direct from the world's best manufacturers as the official UK distributor and dealer for many leading brands such as DJI and Atmos and its popular Marlyn Cobalt drone.

### Survey Equipment - Drones and Receivers

Their survey equipment includes drones and receivers from leading brands like Tersus and Oculus. All their survey equipment and GNSS receivers are sourced direct from the world's leading GPS survey equipment manufacturers and are available to purchase online. They are UK based and they can get hold of many different types of equipment to suit your needs, they also have a range of ROV accessories, drones, robots and add ons. If you would like further information on their full range and types of survey equipment and GNSS receivers, please contact them directly and one of their surveying experts can discuss your needs.

Visit AlphaGeo to explore their full range of products, including drones/UAVs and payloads (camera, LiDAR, sensors and sonar), ROVs/underwater drones, land and hydrographic survey equipment (multibeam echo sounder; side scan sonar and sound velocity profiler), along with their software solutions. They have everything you need for your surveying and exploration needs!

Ask about their attractive finance options, which allows you to purchase the equipment your company needs now, whilst spreading the costs over affordable monthly payments and conserving cash within your company.

For further information please contact:  
AlphaGeo  
Website: [www.alphageouk.com](http://www.alphageouk.com)

## LIFTEX GOLD COAST TO FEATURE QUEENSLAND GOVERNMENT

The Lifting Equipment Engineers Association (LEEA) is pleased to announce that the Queensland Government's Department of Regional Development, Manufacturing and Water will present a speaking session on Women in Manufacturing at LEEA's LiftEx Gold Coast event on 12-13 September at the Event Centre, Star Hotel on Australia's Gold Coast. Registration is now open and to attend this session for free, secure your place now at: [events.leeaint.com/liftex-gold-coast/visit](http://events.leeaint.com/liftex-gold-coast/visit).

The manufacturing industry is experiencing substantial growth in what is arguably one of the tightest labour markets in its history. This is leading to manufacturers across Queensland to diversify their workforce.

The Queensland Government is committed to arming local manufacturers with the tools, skills, and funding to ensure they can diversify their workforce to remain competitive and become market leaders. At LiftEx Gold Coast, the Department of Regional Development, Manufacturing and Water will present a free-to-attend session for manufacturers, delivering the Women in Manufacturing Diversity, Equity & Inclusion Toolkit, which will guide them to reimagine the workforce, rethink recruitment practices and programmes and give greater value to diversity and inclusivity in the workplace.

LiftEx Gold Coast is the much-anticipated two-day exhibition and conference hosted by the LEEA, which will bring together leading lifting and height safety equipment suppliers with end-users who are engaged in operating, inspecting, and testing lifting equipment in manufacturing and other key sectors.

Visitors will have the opportunity to view the latest lifting equipment solutions for manufacturing in the exhibition, as well as hearing case studies and insights into the advancements and best practices to boost safety and efficiency in the speaker programme.

Access to all speaker sessions is complimentary, and the programme will include:

- Vertical-market case studies presenting examples of real-world challenges in the mining, construction, renewables and oil and gas sectors, offering attendees solutions and actionable takeaways.
- Technical updates, including standards development and challenges that can be addressed during their development.
- Professional development training workshops offered by Tower Crane Training (LEEA's Licensed Training Centre) for pre-use inspection of lifting equipment. Valued at over \$600.
- A session on LEEA's Military Transition Scheme will detail how LEEA is connecting skilled and experienced individuals transitioning from the armed forces into civilian life and potential employment.
- An appearance by Beaconsfield Mining Survivor, Brant Webb, who will talk about how his experience has given him a unique perspective on safety, resilience, and the human capacity to endure. His story is a stark reminder of the importance of safety protocols and procedures in high-risk environments.

For the full speaker programme and to register, visit:  
[events.leeaint.com/liftex-gold-coast/speaker-programme](https://events.leeaint.com/liftex-gold-coast/speaker-programme)  
 For more information contact:  
[justin.boehm@leeaint.com](mailto:justin.boehm@leeaint.com)  
[leah.phelps@leeaint.com](mailto:leah.phelps@leeaint.com)

## LALIZAS UK ANNOUNCES NEW OFFICES & WAREHOUSE IN PORTSMOUTH

Lalizas UK, specialists in the production and distribution of high-quality marine safety equipment, proudly announces its newly acquired offices and warehouse in Portsmouth.

As an integral part of the Lalizas Group, the UK Branch offers a comprehensive safety solution for commercial, leisure and military marine and offshore markets from the Lalizas lifesaving and firefighting equipment.

Additionally, these offerings include products of premium manufacturers that are also part of the Lalizas Group, such as Arimar liferafts and inflatable boats, Nuova Rade plastic equipment for marine use, Ocean fenders, Max Power thrusters and Lofrans' windlasses. In addition, Lalizas UK is the exclusive local distributor for ACR Electronics and Pains Wessex marine distress signals.

Spanning approximately 1,500 sqm, the new facility is strategically located in the South of England – a vital hub of the UK maritime market.

Beyond its prime location, the facility has an expanded range of in-stock products, and a dedicated product showroom for educational purposes, providing the opportunity to strengthen long-term relationships for mutual growth. Along with the new facility, the team is, of course, providing further training to existing staff for new responsibilities and systems. Additionally, they are looking to expand their personnel both operationally and commercially to enhance their customer service capabilities.

### Global Strategy

This milestone venture signifies a pivotal moment in Lalizas global strategy, underscoring the significance of the UK market.

Stavros Lalizas, founder and CEO of the group, commented, "Lalizas UK has been an essential part of the Lalizas Group for years. The acquisition of this new state-of-the-art facility underscores our long-term commitment to meeting the evolving needs of our esteemed UK clientele."

The recent appointment of Philip Kleinot as the country manager in February 2024 further strengthens the Lalizas UK team. With a rich history of collaboration with the group, Philip's expertise was instrumental in establishing and expanding Lalizas Spain. His relocation in the USA saw him play a crucial role in steering Lalizas/Alexander towards profitability and seamless integration within the Lalizas Group.

For further information please contact:  
 Website: [www.lalizas.com](http://www.lalizas.com)

## ORDERS FLOOD IN FROM SEAWORK

Just eight weeks after exhibiting at Seawork, Prior Power Solutions has secured four new customers with ongoing discussions for more.

Exhibiting for the first time in over a decade, the engine and drive specialists from Great Yarmouth, Norfolk, picked up orders from customers across the country from as far afield as Cornwall and north-west Scotland. Official dealers for big marine commercial brands such as Volvo Penta and Cummins, the company generated several dozen enquiries from Europe's largest on-water commercial marine and workboat exhibition.

"With the orders secured so far, and projects we are working on, we're looking at tens of thousands of pounds worth of orders for parts and engines from this show," Stuart Holland, parts and engine sales manager confirmed.

Providing a wide range of engine maintenance and ship repair services nationwide, Prior Power Solutions is supporting the transition to cleaner power for marine commercial activities. Speaking after the show, service manager Daniel Platten said, "Seawork was a great opportunity for us to catch up with so many of our service customers face-to-face. Being able to display a full-size Integrated Propulsion System, developed by Volvo Penta, on our stand was a real crowd-puller."

"Designed to enhance a vessel's efficiency, control, speed and ease of use, it's a system we've worked with several vessel operator/owners on and in discussions for new exciting applications and it's really effective at saving fuel. Combined with diesel-electric hybrid options, this is definitely the way forward for sustainable power in the marine commercial world, and one we are at the forefront of supporting."

"We're looking forward to next year's show already."

For further information please contact:  
 Prior Power Solutions  
 Website: [www.priorpower.com](http://www.priorpower.com)
